Patients with Aspirin-Exacerbated Respiratory Disease (AERD), or Samter's Triad, should completely avoid all non-steroidal anti-inflammatory drugs (NSAIDs) that inhibit the COX-1 enzyme.

This list includes most commonly available COX-1 inhibitors in the United States – the generic drug name in **bold**, followed by most of the brand names in *italics*. These medications should all be avoided. Please read all medication labels, and check with your healthcare providers to ensure that you are not mistakenly given a prescription for a medication listed below.
